Untitled document

Sprint charges for incoming international calls, I know. Imagine my surprise to see additional charges for calls to India. I had not called anyone in India. As it turned out, my friend Rashid had called me several times and, I was charged for incoming calls.

There are so many calling apps on the market for the iPhone and Android technology. Bobsled is just the latest addition. What I like about Bobsled is the quality of the call when I talking to Rashid in India!

Calling

- Bobsled lets you make free calls to your Facebook friends and any mobile or landline number in the U.S., Canada or Puerto Rico. It's absolutely free! Use it to keep in touch anywhere you have an Internet connection.

Flexible

- Want to text from your browser or make a call from your tablet? Bobsled does that.

Universal

- Bobsled works on any carrier, anywhere in the world - for free!

Social

- Bobsled unifies your phone book with your Facebook friends in one central hub.

Anywhere

- Bobsled takes contacts, calls, and messages to the cloud so you can communicate from anywhere.

Easy

- Anyone can Bobsled! There's nothing new for you or your friends to sign up for.

Free

- The best things in life are free, and so is Bobsled! All you need is an Internet connection.

Currently Bobsled only supports free calling to phone numbers in the US, Canada and Puerto Rico. Please check <http://Bobsled.com> and our Facebook page (<http://www.facebook.com/letsbobsled>) for updates.

If you wish to make fee online calls with Bobsled, then you and your friend will need to sign into Bobsled with your Facebook accounts. You can make calls to each other online from anywhere in the world.{jcomments on}
