The 2012 edition of the Toyota Yaris is an innovatively designed compact sedan that is designed to attain in the neighborhood of 32 miles per gallon with an automatic sedan and 30 miles to the gallon with the hatchback styles. The riding experience for driver and passengers is a smooth one and they are responsive to your commands and secure in handling. They are earning a reputation in the automobile industry for being reliable and for their standard packages of features.

They are base priced around \$13-14K, come with front wheel drive systems and have been designed to seat two in the front and three in the back seat comfortably. Over the period of twelve months, they are touted to save in the area of \$1,732.00 while attaining 30 miles to the gallon through the confines of the metropolitan area and 35 miles per gallon on the freeways.

Those industry eye catching standard features are inclusive of their Star Safety System. And that is truly a system of air bags, an anti-lock braking system that is assisted by brake assist and Smart Stop technology and some front seating that has been designed to protect you against whiplash.

There are some attractive front and rear sport bumpers and a rear spoiler that adds to the allure of these vehicles as well as some integrated fog lamps. A remote keyless entry system is integrated into each of these vehicles along with powered door locks and an illuminated entry.

The entertainment systems evolve around a am/fm radio system, a compact disc player, an MP3 player and an octet of speakers. That system is of studio high definition quality and the speakers have been well placed. There's a convenient USB port available with pod
